PDFOne .NET

Create, modify, view, print, search, redact, encrypt, digitally sign, annotate & reorganize PDF documents and forms

Gnostice PDFOne .NET is a versatile PDF component suite for .NET developers to implement PDF-related tasks in their applications. PDFOne can create, edit, view, print, search, redact, encrypt, decrypt, digitally sign, merge, split, reorganize, bookmark, annotate, watermark, and stamp PDF documents. PDFOne can also create, edit, delete, fill and flatten PDF form fields. PDFOne .NET does all of this without any external PDF software such as Adobe PDF library, Adobe Acrobat Professional or Ghostscript. PDFOne components come with hundreds of functions and properties that put immense power in the hands of the developer. They hide the complexity of the PDF format and allow developers to quickly implement PDF-related features. PDFOne is thread safe and can be used in medium-trust ASP.NET Web applications. PDFOne is also based entirely on managed code.
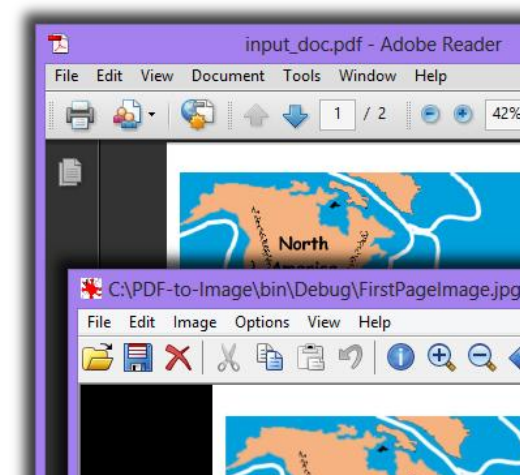

Content Creation

PDFOne can create documents from scratch or create new content on existing documents. With PDFOne, you can render formatted text, auto text, images, shapes, form fields (AcroForms), annotations (markups, comments, stamps, watermarks), and tables. PDFOne can also add bookmarks, digital signatures, headers and footers.
PDF Conversion

PDFOne can export PDF page content to image formats such as BMP, JPG, PNG, etc.

…and to text too.

ASP.NET Support

PDFOne's PDFDocument component can be used in ASP.NET WebForms and MVC Web applications under Medium Trust.

PDF Viewing

PDFOne comes with a PDF viewer component that enables your applications to display PDF documents without requiring Adobe Reader. There is also a PDF printer component for printing PDF documents.

XtremeDocumentStudio .NET

Next-generation multi-format document-processing component suite for .NET developers

Document Conversion

No software printer. No unmanaged code. No Office automation… No headaches! XtremeDocumentStudio enables your applications to convert documents and images from one format to another using pure .NET code. Currently, XtremeDocumentStudio supports conversion from PDF, DOCX, BMP, PNG, JPEG and TIFF formats to PDF, BMP, PNG, JPEG and TIFF.

```
static void Main(string[] args)
{
    // Initialize a document manager instance
    DocumentManager dm = new DocumentManager();

    // Convert a DOCX document to PDF
    dm.ConvertDocument("Sample.docx", "Converted.pdf");
}
```

```
private void button1_Click(object sender, EventArgs e)
{
    // Load a document and display it
    documentViewer1.LoadDocument("Sample.docx");
}
```

Document Viewing & Printing

XtremeDocumentStudio enables you to use a single viewer component to display multiple document and image formats. You do not even have to specify the input format. The viewer and printer components can automatically detect and process DocX, PDF, BMP, PNG, JPG, WMF, EMF, and TIFF format files.

Why Gnostice

At Gnostice, our vision is to help people accomplish their business with ease. To that end, we have released products that have consistently exceeded the expectations of our customers. With our feature-rich products, we seek to provide unprecedented control over document-processing to our customers.

Gnostice Product Architecture

- Superior design – flexible, modular and extensible
- Versatility – thread-safe, medium trust, pure.NET code
- Extreme ease of use of the API
- Total end-to-end solution
- Robust performance

Gnostice Buyer Advantage

- Great value for the money
- 30-day money-back guarantee
- No-nonsense, hassle-free, perpetual-use licensing
- Unlimited royalty-free commercial distribution of end-user products
- Free major and minor updates for 12 months
- Free e-mail support for 12 months

"The main feature of the product is its ability to quickly create, generate, and manipulate PDF documents with only a few lines of code. "

- Anand Narayanaswamy - asp.netPro magazine

-

"We are very happy with your products, so anything related to PDF we try to see first if Gnostice can provide it."

- Henry West, City of Phoenix, Information Technology Department

-

"I have now re-engineered our deployment process which has now been hugely simplified with V5 [PDFOne .NET] "

- Kerrin Banner, Managing Director, Secureware Solutions Ltd.
